the majority of the world s population live in environments with artificially weakened wind as buildings in urban areas form wind breaks and reduce wind speeds anthropogenic heat is also generated and during the summer dense urban areas suffer from the urban heat island effect a known urban climate problem this book discusses how to evaluate the urban wind environment including ventilation performance and thermal comfort this book is organized in two parts wind environment and the urban environment and criteria for assessing breeze environments it includes chapters on sea breeze in urban areas thermal adaptation and the effect of wind on thermal comfort health risk of exposures pollutant transport in dense urban areas legal regulations for urban ventilation and new criteria for assessing the local wind environment keywords urban wind environments urban heat island urban climate land use change thermal comfort risk assessment urban air pollution urban ventilation

this book presents a collection of papers presented at the 3rd world congress on integrated computational materials

engineering icme a specialty conference organized by the minerals metals materials society tms this meeting convened icme stakeholders to examine topics relevant to the global advancement of icme as an engineering discipline the papers presented in these proceedings are divided into six sections 1 icme applications 2 icme building blocks 3 icme success stories and applications 4 integration of icme building blocks multi scale modeling 5 modeling data and infrastructure tools and 6 process optimization these papers are intended to further the global implementation of icme broaden the variety of applications to which icme is applied and ultimately help industry design and produce new materials more efficiently and effectively

annotation effects of radiation on materials fourteenth international symposium was presented at andover ma june 1988 the symposium was sponsored by astm committee e 10 on nuclear technology and applications the papers from the first three days of the symposium appear in the two volumes of this publication volume i encompasses radiation damage induced microstructures point defect solute and gas atom effects atomic level measurement techniques and applications of theory volume ii includes mechanical behavior all papers dealing with pressure vessel steels breeder reactor components dosimetry and nuclear fuels the fourth day of the symposium was devoted to the single topic of reduced activation materials see tk9204 the two volumes are separately sold at 127 and 128 respectively each is independently indexed annotation copyrighted by book news inc portland or

post continental philosophy outlines the shift in continental thought over the last 20 years through the work of four central figures gilles deleuze alain badiou michel henry and françois laruelle though they follow seemingly different methodologies and agendas each insists on the need for a return to the category of immanence if philosophy is to have any future at all rejecting both the german phenomenological tradition of transcendence of the ego being consciousness alterity or flesh as well as the french structuralist valorisation of language they instead take the immanent categories of biology deleuze mathematics badiou affectivity henry and axiomatic science laruelle as focal points for a renewal of thought consequently continental philosophy is taken in a new direction that engages science and nature with a refreshingly critical and non reductive approach to life set theory embodiment and knowledge however each of these new philosophies of immanence still regards what the other is doing as transcendent representation raising the question of what this return to immanence really means john mullarkey s analysis provides

a startling answer by teasing out their internal differences he discovers that the only thing that can be said of immanence without falling back into transcendent representation seems not to be a saying at all but a showing a depiction through lines because each of these philosophies also places a special value on the diagram the common ground of immanence is that occupied by the philosophical diagram rather than the word the heavily illustrated final chapter of the book literally outlines how a mode of philosophical discourse might proceed when using diagrams to think immanence

this book discusses the geology hydrogeology and water quality geochemistry of karst systems in geologically young terrain using the state of florida as an example also discussed are sinkhole development models sinkhole risk eogenetic karst features developed in rocks as young as 125 000 years and as old as 65 million years and karst landscapes of florida including regional geology and geomorphology with important examples of karst features such as springs sinkholes caves and other karst landforms the eogenetic karst of florida is largely covered and this book extensively discusses the interactions of karst processes with sand and clay rich cover materials
