at the intersection of translation studies and latin american literary studies the translator s visibility examines contemporary novels by a cohort of writers including prominent figures such as cristina rivera garza césar aira mario bellatin valeria luiselli and luis fernando verissimo who foreground translation in their narratives drawing on latin america s

long tradition of critical and creative engagement of translation these novels explicitly visibly use major tropes of translation theory such as gendered and spatialized metaphors for the practice and the concept of untranslatability to challenge the strictures of intellectual property and propriety while shifting asymmetries of discursive authority above all between the original as a privileged repository of meaning and translation as its hollow emulation in this way the translator's visibility show that translation not only serves to renew national literatures through an exchange of ideas and forms when rendered visible it can help us reimagine the terms according to which those exchanges take place ultimately it is a book about language and power not only the ways in which power wields language but also the ways in which language can be used to unseat power

from the perspective of latin american studies this volume offers a critical contribution to the current debate on world literature it is structured around three conceptual blocks gatekeepers as the dispositives and actors mediating the international circulation of literature translation as an unavoidable but always problematic mechanism and local literatures as modes of writing that remain intrinsically tied to their contexts
